Profile

I was born in 1987 and I'm currently living and working in Berlin as a frontend developer and visual designer. I got extensive experience in software development in general and like to work with innovative web technologies nowadays. As an engineer I like to solve problems in efficient and robust fashion but at the same time care deeply about good technical as well as visual design. I'm eager for learning new ways of problem-solving and increasing my knowledge in technologies and workflows. I value good thoughts and ideas and like to be surrounded by a motivated and enthusiastic team. Occasionally I'm coaching junior developers or students in HTML/CSS/JS basics.

Experience

FULL-STACK DEVELOPER
STYLA GMBH — 2014 - PRESENT
Designing and implementing various user-facing elements for desktop and mobile applications. Involved in concepting and developing micro-services, mostly written in node.js. Technical SEO management.
